Camping and Facilities

**Campfire information** – A fire prohibition has been declared by the Queensland Parks and Wildlife Service (QPWS) from 0001hrs Thursday 3 December 2020 until further notice. **Open fires must not be lit anywhere in Moreton Island National Park and Recreation Area.** Ensure you have a working gas, fuel or electric stove for cooking during your visit.

For all camping or vehicle access permit enquiries visit [mulgumpincamping.net.au](http://mulgumpincamping.net.au) or phone (07) 3506 2371. The Department of Environment and Science (DES) continues to monitor and receive guidance from the Government in relation to COVID-19 health and safety information. All day visitors should practice social distancing and hygiene protocols at all times – wash hands often with soap and water and if this isn’t possible, use an alcohol-based hand sanitiser. Cover your coughs and sneezes with your elbow or a tissue, keep your rubbish secure and dispose of in the bins provided or take home, and stay at home if you are unwell. Only visit sites where there are car spaces available in the carpark, follow social distancing measures and adhere to public gathering numbers. **Ensure you have checked barge operation times and tidal conditions to allow for travel to and from the island.**

Drivers should use extreme caution and check depth before attempting all creek crossings. Driving on dunes, vegetated areas and on unofficial tracks can cause significant damage to the dunal systems, and contribute significantly to the risk of further erosion. **To avoid a fine drive only on officially constructed roads, tracks and beaches.** Tangalooma to Kooringal (western beach) is accessible at low tide only. **Tangalooma to Bulwer** (western beach) access mid to low tide; use caution when crossing creeks. **Bulwer to North Point** (via northern beach) is constantly changing and rarely trafficable due to the natural outflow of the Heath Island tidal creek system. Sand erosion is apparent between Comboyuro Point and Heath Island, use caution when traversing this area. Shallow creeks and draining gutters are boggy in this area and extreme caution is required before attempting any water crossing. **Cape Moreton to Mirapool Bypass** (eastern beach) – deep holes can occur along the entire length of Eastern Beach, exposing coffee rock and making travel difficult between mid and high tides. Tides can cause unexpected and hidden banks, washouts and gutters. Care should be exercised during high tides around the timbered area north of the Kooringal-Mirapool Road and between Cape Moreton and Bulwer Blue Lagoon Road. **North Point** – low tide vehicle access only to North Point beach due to changing dune movement. Beach hazards such as steep hidden banks, fallen trees and washouts are likely in this area. Travel two hours either side of low tide only to avoid being stranded at North Point and Champagne Rocks. **Yellow Patch** – beach lagoons and waterways are constantly changing. Caution: deep water at some creek and lagoon crossings with quicksand on lagoon edges and shoreline erosion.

**Beach driving conditions**

Lack of rainfall has made the roads and tracks soft and trafficable and without ongoing rainfall will continue to dry out quickly and conditions will deteriorate. **Check your tyre pressure.** Too much tyre pressure can make driving difficult and damage roads and vehicles. **Cowman Bypass** – is very soft and boggy in some places and care should be taken when traversing. Ensure tyre pressures of your vehicle and as well as towed vehicles are reduced to the appropriate level. **Bulwer-North Point Road** (via Five Hills) is firm with some rough sections. Suitable for high clearance 4WD vehicles only. **Bulwer-Blue Lagoon Road** is soft in some sections but trafficable. **Blue Lagoon day-use access track and carpark** is soft but trafficable. Alternative access to Blue Lagoon is available via the walking track from Blue Lagoon camping area. **Mirapool Bypass Road** is soft, boggy and rough in some spots. **Tangalooma Bypass Road** is very soft and boggy in some places and care should be taken when traversing. **Middle Road** is soft, very dry and extremely rough in some sections. Observe speed limits on the island. Inland roads are 30 km/h and open beaches 60 km/h unless otherwise indicated.

**Inland track conditions**

Inland track conditions

Walking track conditions

**Telegraph, Five Hills, the Rous and Tempest walking tracks** are open and in fair condition. Take your own water and stay hydrated in hot conditions. **Note:** there are no water points along these walks. Check for Park Alerts before setting out and obey any track-closed signs.

**General Alerts**

- **QLD road rules apply and are enforced on island tracks and beaches.** Ensure that you acquire & display a valid vehicle access permit.
- **Low clearance and all-wheel drive vehicles are not suitable for Moreton Island’s inland tracks.** Ensure your vehicle is in 4WD and freewheeling hubs (if fitted) are in the locked position.
- **For beach driving, travel at low tide or within two hours either side of low tide.**
- **Vehicle recovery equipment is essential.** Know where your recovery points are and know how to use your recovery equipment.
- **Reducing your tyre pressure will assist when driving on soft sand.** Remember to keep within the tyre manufacturer’s specifications, as reduced tyre pressure will affect your vehicle’s performance. When driving with reduced tyre pressure, avoid sharp turns, sudden braking, high speeds and driving over rough surfaces. Tyres can come of their rims and cause serious accidents.
- **Tangalooma Wrecks** - Visitors should obey all warning signs and avoid getting too close, climbing on, or swimming though the shipwreck structures. Strong currents exist through this area. Swimmers should be competent in these conditions.
- **Vehicle Recovery Service** - A private vehicle recovery service operates on Moreton Island. For assistance and pricing contact Moreton Island Recovery Service on 07 3408 3545 (0414 949876) or 07 3408 3930 (0475 563642).
- **Marine Animal Strandings** - Contact 1300 130 376 to report any injured or dead dugong, turtles, whales or dolphins.
- **Additional Information** - Check Park Alerts for updates and information regarding changes to park conditions.
