Welcome to
Kondalilla, Mapleton Falls and Mapleton national parks

Jinibara People are the Traditional Owners and determined Native Title holders of this beautiful area. Please respect these sacred places and leave behind no trace of your visit.

Soak up the wonderful atmosphere of the Blackall Range, and explore the Sunshine Coast’s scenic, mountainous backdrop. Discover waterfalls nestled in cool rainforest and impressively tall eucalypt forests on your choice of walks. Experience the thrills of mountain biking, trail-bike riding or the joys of trail riding on horseback. Gaze at sweeping coastal and range views from lookouts, enjoy family time in tranquil picnic areas or stay overnight in scenic, walk-in camping areas. Top off your ‘day in the hills’ with a visit to one of the pretty hinterland townships dotted across the Blackall Range.

The national parks of the Blackall Range are the forest jewels of the Sunshine Coast. Within 30 minutes’ drive of coastal suburbia, you can find yourself immersed in the cool rainforests and waterfalls of Kondalilla or standing on the edge of the western escarpment at Mapleton Falls.

There is tremendous value in this experience, that is, to have these pockets of wilderness so close and accessible and, once in them, you feel so far away.

There are many opportunities for a getaway escape in these forests, whether it be a quiet mid-week contemplation beside a mossy cascade, a semi-remote bush walk up the Obi Obi Gorge or a day of forest mountain biking from Mapleton day-use area.

These forests also contain a trove of unique and ecologically significant plants and animals—on display for the observant visitor.

Discover the Range

Spend a day or two walking through the Blackall Range to enjoy majestic waterfalls, rainforests, tall wet forests of flooded gum and blackbutt, heathy scribbly gum forests and local wildlife.

Make the most of the best weather for bushwalking in autumn and spring. In summer, plan an early morning visit in the cooler part of the day and check the weather to avoid storms. Explore these parks with the family—they all offer grassy spots to set up for a picnic either before or after you venture on forest walks and trails.

Kondalilla National Park

Kondalilla National Park is near Montville and only 100km out of Brisbane. Kondalilla, an Aboriginal word meaning ‘rushing waters’, describes this park’s glorious Kondalilla Falls. Visitors can walk down to the rock pool above the falls via a steep switchback track from the Picnic Creek circuit. From the rock pools, a short, 190m track will take you to the Kondalilla Falls lookout, which offers a great view of the falls. The waterfall is at its best during the summer wet season.

Doing the combined Picnic Creek and Kondalilla Falls circuit takes you past exposed rocky bluffs with dry eucalypt forest and grasstrees, and on down through cool, lush rainforest to the base of the falls.

There are over 300 stairs on the Kondalilla Falls circuit. From the rock pools, the Kondalilla Falls circuit winds over 1km with numerous switchbacks to descend the 100m into
Mapleton National Park

You can venture along the Linda Garrett circuit 5 from Delicia Road entry point, through rainforest, a palm grove and tall wet eucalypt forests dominated by blackbutt, turpentine and brush box. It follows the head waters of Gheerulla Creek, home to the great barred frog Mixophyes fasciolatus. The Pilularis walk 6 from Leafy Lane trail head entrance leads you through tall, open forest with an understorey of rainforest shrubs and ferns.

Explore rainforest, palm groves and open eucalypt forests along three, short, family-friendly walks in Mapleton National Park. Discover the old, giant bunya pine along the Bonyee walk 7 and have some fun guessing its age, and imagining what the landscape would have been like when it was a seedling.

Sunshine Coast Hinterland Great Walk

Explore the 58km long Great Walk in all its beauty. The Great Walk traverses the three Blackall Range national parks offering very diverse walking opportunities. Tackle the whole 58km walk over three days, making use of the three remote walkers’ camps, or do shorter, half-day walks on some sections.

One magical place is Flatrock, only a 6km hike in from the Baroon Pocket Dam car park on the Great Walk section to Kondalilla. There are fewer visitors here; great if you love solitude! Enjoy lunch by the creek, where you’ll often be joined by numerous butterflies that seem to enjoy the peace and quiet just as much as you will. More information at qld.gov.au/SunshineCoastGreatWalk

Wildlife Wonders

The Blackall Range is home to, and a refuge for, many species of wildlife. Native animals recorded for the Blackall and nearby Conondale ranges include 70 species of reptiles and 32 species of frogs. Several frog-monitoring sites are located across the Blackall Range as part of planned research and recovery efforts for vulnerable, rare and endangered species.

In Mapleton National Park, watch the Australasian figbird feeding on piccabeen fruits in the rainforest. Listen for the ‘whip-crack’ calls of the shy, eastern whipbirds as they forage on the forest floor, or the deep-throated call of the colourful wompoo fruit-dove. Look to the open skies to glimpse peregrine falcons—fastest birds on Earth—that often roost and soar around the cliff lines, and from August to November, nest on the cliffs near the edges of the falls.

Visit any of the picnic areas and you’ll see the very common Australian brush-turkey—male birds untiringly build nest mounds up to 1.5–2m in height during breeding season. Lace monitors and water dragons visit the picnic areas at Kondalilla Falls. Please do not feed them.

Overnight escapes

Trek into one of the secluded walkers’ camps on the Sunshine Coast Hinterland Great Walk and camp beneath the starlit sky or access Gherulla camping area in Mapleton National Park by 4WD and pitch a tent at one of the three campsites beside Gherulla Creek. As the day ends, the sound of cicadas pulsates through the air filling your head with the sound of a Queensland summer.

Remember you need to book your site in advance to avoid disappointment. Organise your camping permit online at qld.gov.au/Camping

Camping at a glance

Kondalilla National Park
Flaxton walkers’ camp
This is the first walkers’ camp on the Great Walk, 16.6km one-way from the Baroon Pocket entrance or 1.4km from Flaxton Mill Road. It is surrounded by tall forest with a fern understorey. Access is on foot only.

Mapleton National Park
Gherulla camping area
Access to the camping area is via Sam Kelly Road (off Eumundi–Kenilworth Road) by high-clearance 4WDs. Make sure to bring plenty of drinking water or come prepared to treat water. Creek water is unsuitable for drinking. Please note that this small camping area is popular for those accessing the Gherulla trail bike track.

Treat water before drinking

Be adventurous

Mountain biking
Enjoy a mountain bike trail to Oaky Creek lookout 1 in Mapleton National Park. Explore different forest communities as you travel along this trail. Wet eucalypt forest gives way to drier woodland, with grassy understorey along the ridge. At the end of the trail, dismount for a short 200m return walk to the lookout to enjoy spectacular views of the Conondale Range and Mary Valley. Be aware you may encounter trail bikes. Gheerulla trail bike track A runs next to and crosses the mountain bike trail 1.

Shared trails
You can explore three shared trails from Mapleton day-use area. You’ll be surrounded by forest on the Turpentine trail 2; a narrow, two-way track through wet eucalypt forest and scribbly gum forest. On the Piccabeen circuit 3 you’ll enjoy cool, piccabeen palm groves, tall blackbutt forest and rainforest. Head off on the Kureelpa Falls circuit, 4 travelling through open forest, to view Kureelpa Falls on the South Maroochy River.

Be considerate—trail sharing
• Cyclists give way to horseriders and walkers, and alert others when approaching.
• Walkers give way to horses.
• Bikes and horses are not permitted on walking tracks.

South East Queensland horseriding trail network
This trail network offers further opportunities for self-reliant riders (horse and mountain bike) with experience in bush navigation. There are minimal directional signs.

Four wheel driving
Take a 4WD journey from Mapleton township and travel north on Mapleton Forest Road. Turn off on Buckby Road and follow the Point Glorious signs to the Point Glorious lookout. A short walk takes you to the lookout, where you can take in the remarkable views over the coast and hinterland. Roads are unsealed and require high-clearance 4WDs.

Rock sports
If you are an abseiling or rock-climbing enthusiast, and up for a challenge, try out your skills on the rhyolite bluffs at Point Glorious.

Trail biking
Keen trail-bike riders can explore Mapleton National Park on the winding 26km Gheerulla trail bike track A over hilly terrain with tall blackbutt and scribbly gum forest. Trail-bike riders must be licensed using road-registered motorcycles. Be aware that a separate mountain bike trail runs between the trail bike track loop. For everyone’s safety and enjoyment, stay on the trail bike track.

Mapleton National Park has 30km of shared trails for walkers, mountain bikers and horse riders (left and centre); Gheerulla trail bike entry (below)

Ranger favourites

“Kondalilla National Park’s best-kept secret is the base of Kondalilla Falls. Many people finish at the rock pool or the Kondalilla Falls lookout. If you continue down to the base of the falls, pause quietly at the bridge and look into the clear water—you can quite often spot eels and other water wildlife.

Ranger Nat”

My favourite hike is the 10km Baroon Pocket Dam to Kondalilla section of the Great Walk. The scenery and vegetation constantly changes as you descend and ascend the gullies on the walk. The walk offers great views over the Obi Obi Gorge and a picnic beside the creek on Flatrock is definitely recommended.

Ranger Donna

and other water wildlife.

quite often spot eels in clear water—you can pull over to the bridge and look into the falls. Pause quietly at the base of the falls, and if you continue down to Kondalilla Falls lookout you can see the rock pool or the base of Kondalilla Falls.

So there are a few big favourites amongst park rangers. If you explore the northern extremity of Mapleton National Park where you can check out the view at Point Glorious at the end of Sam Kelly Road, you can see the ‘big sand blow’ (Cooloola Sandpatch) and also get a great view over the Obi Obi Gorge and a picnic beside the Obi Obi Creek lookout.

My favourite hike is the 10km Baroon Pocket Falls circuit. It’s a circular walk that starts at the trail head on Bonyee Road, To Montville, via the Nambour–Mapleton Road. It’s a medium to hard track—bh and other trees are prone to falling branches. Strong wind increases the risk of storms and heavy rain can flood some walking tracks resulting in closure for public safety, so always check weather conditions before you visit. During extreme weather periods (mostly in spring and summer) storms can occur, and high rainfall can flood some walking tracks resulting in closure for public safety.

Make your visit memorable for all the right reasons.

- Choose activities that suit the skills, experience and fitness of your group.
- Supervise children closely, especially near cliffs and edges.
- Stay behind barriers and observe all safety signs.
- Let somebody know where you are going, when you plan to return and what to do if you’re late or lost.
- Leave plenty of time to reach your final destination in daylight and always keep your group together.
- Plan your activity time to avoid heat exhaustion on hot days.
- Always check weather conditions before you visit. During extreme weather periods (mostly in spring and summer) storms can occur, and high rainfall can flood some walking tracks resulting in closure for public safety.

Do not enter the park in high wind conditions—blackbutt and other trees are prone to dropping branches. Strong wind increases the risk of branch fall and injury.

Bike riders beware—fallen branches can get caught in bike spokes.

Rock pool safety: Be aware that the water is cold, depth is variable and there are submerged objects. Rocks can be very slippery.

Be aware that the water is cold, depth is variable and there are submerged objects. Rocks can be very slippery.

Plan your activity time to avoid heat exhaustion on hot days.

Adventure safely

To know your way around, take a map and follow markers and signs carefully (far left); Kondalilla Falls plummets 90m into the gorge below (centre); Obi Obi Creek (above).

All images by Adam Creed © Qld Govt

The essential packlist

- Mobile phone—reception may be poor in places but is sometimes possible from high points on the trail system.
- First-aid kit including sun and insect protection.
- Adequate drinking water or sterilisation tablets—drinking water is not provided in the park.
- Suitable footwear, clothing and equipment for the activity you are planning.

Take a map and follow markers and signs carefully (far left); Kondalilla Falls plummets 90m into the gorge below (centre); Obi Obi Creek (above).
Ranger Nat and other water wildlife. If you continue down to Kondalilla Falls lookout. Many people finish at the base of the falls, which you can see from Point Glorious lookout.

Ranger Mark can see the 'big sand blow' (Cooloola Sandpatch) and northern extremity of Mapleton National Park where you can see Gheerulla. Ranger Donna recommends camping area Gheerulla walkers' camp.

My favourite hike is the 10km Baroon Pocket walk on Delicia Road. It includes both one-way and return tracks with moderate to steep hill sections, and vegetation constantly changes as you descend and ascend the gullies on the walk. The walk offers great views over the Obi Obi Gorge and a picnic beside the creek.

Adequate drinking water or sterilisation is required before you visit. During storms can occur, and high rainfall can flood some walking tracks resulting in closure for public safety. Always check weather conditions before you visit. During extreme heat, avoid heat exhaustion on hot days. Plan your activity time to return and what to do if you're late or lost.

Make your visit memorable for all the right reasons. Adventure safely by choosing activities that suit the skills, experience and fitness of the group. People with some experience and fitness can try Piccabeen circuit, Turpentine trail and East Cedar Creek Road. Experienced riders and horses can try the Skene Creek, Dale Creek and Bonyee tracks. Experienced and fitness are required for the Picnic Creek, Obi Obi Creek and Delicia Road tracks.

Obi Obi Creek (above) plunges 90m into the gorge below and is variable and there are submerged objects. Rocks can be dangerous for bikes. Bike riders beware — fallen branches can get caught in bike spokes. Branch fall and injury. Dropping branches. Strong wind increases the risk of branch fall and injury. Some trees are prone to — blackbutt and other trees are prone to falling. Do not enter the park in high wind conditions.
